

## **Art**

- The child learned to identify and match different artistic symbols and images.
- They practiced visual perception and observation skills while playing the game.
- They developed an appreciation for different artistic styles and motifs.

## **English Language Arts**

- The child improved their reading skills by identifying and reading words on the cards.
- They practiced vocabulary and word recognition by naming objects or concepts depicted in the images.
- They developed their listening and speaking skills by describing the images to their peers.
- They learned to follow instructions and take turns while playing the game.

## **Foreign Language**

- The child practiced vocabulary and word recognition in the foreign language by naming the objects or concepts depicted in the images.
- They developed their listening and speaking skills in the foreign language by describing the images to their peers.

## **History**

- The child learned about historical events, landmarks, or figures depicted in the images.
- They developed an understanding of how different historical periods or cultures are represented visually.

## **Math**

- The child practiced visual discrimination and pattern recognition skills while identifying matching symbols or images.
- They improved their counting and number recognition skills by counting the number of symbols or images on the cards.
- They developed their spatial awareness and geometry skills by identifying symmetrical patterns on the cards.

## **Music**

- The child practiced listening skills by identifying musical instruments depicted in the images.
- They learned about different musical notes and symbols represented in the game.
- They developed an appreciation for the connection between visual representations and musical concepts.

## **Physical Education**

- The child improved their hand-eye coordination and motor skills while playing the game.
- They engaged in physical activity by moving and reaching for the cards during the game.

## **Science**

- The child learned about different scientific concepts or phenomena represented in the images, such as animals, plants, or natural forces.
- They developed observation and critical thinking skills by identifying similarities and differences between images.
- They practiced visual discrimination by identifying the smallest differences between images.

## Social Studies

- The child learned about different cultures and traditions depicted in the images.
- They developed an understanding of diversity and multiculturalism through the variety of symbols and images used in the game.

For continued development, encourage the child to create their own Dobble-style game using their favorite subjects or themes. They can draw or print out their own cards and challenge their friends or family to find the matching symbols or images. This will enhance their creativity, problem-solving skills, and knowledge of various subjects.
