- They developed their vocabulary by learning the names of bike parts and tools used in the repair.
- They improved their reading comprehension by following instructions or manuals to mend the bike.
- Engaged in storytelling and sharing their experience with others, enhancing their oral communication skills.

## Math

- The student applied problem-solving skills to figure out what was wrong with the bike and how to fix it.
- They used measurement and estimation skills to ensure that the bike's parts were fitted and aligned correctly.
- Practiced basic arithmetic when counting and organizing the various nuts, bolts, and washers during the repair.
- Understood the concept of force and motion when adjusting the brakes and gears.

## Social Studies

- The student learned about the history of bicycles and their impact on transportation and society.
- They developed an understanding of environmental conservation and sustainable transportation through bike repair.
- Gained a sense of community and responsibility by fixing the bike and contributing to their household or neighborhood.
- Explored the cultural significance of bikes in different parts of the world and learned about bike-sharing programs.

Continued development can involve organizing a bike repair workshop or club where students can teach their peers how to fix bikes. They can also write a step-by-step guide or create a video tutorial on bike repair, incorporating their language arts skills. Encourage them to research the history of bicycles and present their findings to their classmates as a mini research project to further explore the social studies aspect.
