

## Science

- The student has learned about the structure of the human body, including major organs and systems, through hands-on exploration of the 60-piece anatomy figure.
- They have gained an understanding of human anatomy, including the skeletal, muscular, and digestive systems, by examining the poseable figure and identifying key parts.
- The student has learned about the importance of various body parts and their functions, such as the heart, brain, and lungs, by examining the interactive anatomy figure.

Encourage the student to continue exploring the interactive anatomy figure by conducting further research on the human body. They can enhance their learning by creating presentations or diagrams to demonstrate their understanding of anatomy and organ systems.
