

Art

- The student learned about the elements of design such as color, shape, and texture as they chose materials to represent the elephant and its habitat in the diorama.
- They practiced fine motor skills while cutting, shaping, and gluing materials to create the different components of the diorama.
- The activity encouraged creativity and imagination as the student visualized and constructed their own interpretation of an elephant and its environment.
- They learned about three-dimensional art by creating a scene with depth and perspective in the diorama.

English Language Arts

- The student engaged in storytelling and narrative development as they imagined the daily life and experiences of the elephant and its surroundings.
- They practiced descriptive language by discussing and depicting the different elements in the diorama, such as the elephant's appearance, the landscape, and other animals present in the habitat.
- The activity encouraged communication and collaboration as the student described their diorama to others, sharing their ideas and perspective.
- They had the opportunity to develop vocabulary related to elephants, their habitat, and the ecosystem in which they live.

Science

- The student learned about the physical characteristics of an elephant and its natural habitat, gaining knowledge about the animal's size, diet, and typical surroundings.
- They explored the concept of ecosystems and biodiversity as they included different elements in the diorama, such as trees, other animals, and the geographical features of the elephant's habitat.
- The activity fostered an understanding of animal behaviors and adaptations as the student constructed a scene that highlighted the elephant's interactions with its environment.
- They learned about conservation and the importance of protecting the natural habitats of elephants and other animals.

Encourage the student to expand their diorama-making skills by exploring different animal habitats and creating dioramas of various ecosystems. They can delve into research about different animals and their environments to incorporate educational elements into their dioramas. Additionally, they can experiment with different materials and textures to further enhance the visual appeal and realism of their creations.
