

English Language Arts

- The child developed fine motor skills by manipulating the pegs on the board to form letters and shapes in Arabic script.
- They practiced letter recognition and formation by matching the pegs to the corresponding letter on the board.
- The activity promoted spatial awareness and visual discrimination as the child arranged the pegs to create patterns and designs.
- Through this hands-on activity, the child engaged in multisensory learning, reinforcing their understanding of Arabic language and script.

After completing the pegboard activity, continue to support the child's Arabic language learning by incorporating related games and puzzles. Encourage them to practice writing Arabic letters using different mediums such as sand, clay, or digital writing tools. Integrating Arabic language into daily routines and storytelling can further enhance their language skills.
