

## Outdoor Education

- The student has learned about water safety and the importance of wearing a life vest for boating or water activities.
- They have developed an understanding of the purpose and function of a life vest in keeping them afloat and providing buoyancy in water.
- The activity has also taught them about the proper way to wear a life vest and how to adjust it for a secure fit.
- They have gained an appreciation for the role of personal safety equipment in outdoor water activities.

## Physical Education

- The activity has enhanced the student's physical coordination and motor skills as they learn to move comfortably and confidently while wearing a life vest.
- They have learned to stay calm and balanced in water while wearing the life vest, promoting body awareness and control.
- Wearing a life vest has also provided the opportunity for the student to experience and understand the resistance and support offered by the vest in water, promoting muscle strength and endurance.
- The activity has also encouraged the student to engage in water-based physical activities, promoting overall fitness and well-being.

For continued development, encourage the student to participate in water-based games and activities while wearing a life vest. This can include swimming races, water volleyball, or paddle boarding. You can also introduce the concept of teamwork by engaging in partner activities where each student has to support and assist their partner in the water, reinforcing the importance of water safety and cooperation.
