

## English

- The student has improved letter recognition and formation through tracing and copying words on the whiteboard.
- They have developed fine motor skills and hand-eye coordination while using the whiteboard marker.
- By copying sentences and simple paragraphs, the student has enhanced their vocabulary and spelling.
- They have learned the concept of sentence structure and proper punctuation through copying sentences and paragraphs.

For continued development, encourage the student to practice writing stories or simple compositions on the whiteboard. This can help develop their creativity and language skills. Additionally, you can introduce more challenging vocabulary words or longer sentences for them to copy, helping to expand their language abilities.
