

English

- The child practiced descriptive writing by jotting down observations and feelings during the ferry ride.
- They enhanced their vocabulary by learning new nautical terms and describing the maritime environment.
- Engaged in creative storytelling when imagining the history of the area they were sailing past.
- Explored writing a letter or journal entry about the experience.

Science

- Learned about buoyancy and the principles of flotation and stability, observing the ferry's movement on the water.
- Identified various marine animals and plants, learning about the coastal ecosystem.
- Observed the weather and the effects of wind and tides on the water, gaining an understanding of natural phenomena.
- Explored the concept of navigation and the instruments used to guide the ferry on its route.

Social Studies

- Explored the history and significance of the waterway and the cities or landmarks visible from the ferry.
- Learned about the importance of maritime trade and transportation in the region's economy and culture.
- Observed different types of boats and ships, delving into their purposes and roles in society.
- Engaged with the concept of tourism and how ferries facilitate travel and bring people to different destinations.

Encourage the child to create a scrapbook or digital presentation about the ferry ride, including their writing, drawings, and photographs. They can continue exploring marine life through books, documentaries, or visits to aquariums and nature reserves. Encourage them to research the history and culture of the areas visible from the ferry, fostering a deeper understanding of the places they visited.
