

## **Art**

- Creation of visual representation of the Jurassic Park theme through game design and currency drawings
- Development of creativity and imagination through designing properties and game pieces
- Understanding of color schemes and graphic design elements through Jurassic Park themed visuals

## **English**

- Writing skills enhanced through creating original descriptions for properties and game dialogues
- Reading comprehension through understanding the game rules and instructions
- Verbal communication and negotiation skills through trading and deal-making in the game

## **Foreign Language**

- Opportunity to practice language skills through translating game instructions and property descriptions
- Language immersion through immersive gameplay experience in a foreign language
- Learning new vocabulary related to the Jurassic Park theme

## **History**

- Understanding of the historical context and significance of the Jurassic Park theme
- Exploration of the evolution of dinosaurs and prehistoric era
- Recognition of historical figures and events related to paleontology and archaeology

## **Math**

- Application of basic arithmetic skills through managing money, calculating rent, and making purchases
- Understanding probability and chance through dice rolling and card drawing in the game
- Practice of strategic thinking and planning through property management and investment decisions

## **Music**

- Exploration of sound design and background music creation for the game
- Introduction to Jurassic Park soundtrack and musical themes
- Application of rhythm and tempo concepts in game-related activities and challenges

## **Physical Education**

- Engagement in physical activity during breaks or intermission from the game
- Incorporation of movement-based challenges or exercises related to the game theme
- Integration of fitness and coordination skills in game-related activities

## **Science**

- Investigation and discussion of scientific concepts related to dinosaurs, genetics, and paleontology
- Exploration of environmental impacts and conservation themes in the Jurassic Park setting
- Understanding of real-world applications of scientific principles through game scenarios

## Social Studies

- Exploration of societal interactions, economics, and community development in the game context
- Understanding of cultural and geographical aspects of the Jurassic Park world
- Development of empathy and understanding of diverse perspectives through social dynamics in the game

Encourage students to engage in further creative activities related to the Jurassic Park theme. They can create their own Jurassic Park board game with unique rules and gameplay mechanics, incorporating additional educational elements such as trivia questions about dinosaurs and historical facts about paleontology. Encourage them to also design their own dinosaur-themed artwork, write short stories set in a Jurassic Park environment, or compose music inspired by the Jurassic Park soundtrack.
