

Science

- The child may have learned about the concept of climate change and the impact of melting ice on the environment through the storyline of the movie.
- The movie features a variety of Ice Age animals and their behaviors, which could provide an opportunity for the child to learn about prehistoric creatures and their adaptations to their environment.
- The child may have learned about the concept of extinction and the challenges faced by animals during environmental changes, as these themes are present in the movie.
- Through observing the behaviors and interactions of the characters, the child may have gained an understanding of animal social structures and cooperation.

After watching the movie, you can engage the child in discussions about the concepts of climate change, extinction, and prehistoric animals. This could lead to activities such as creating a diorama of Ice Age creatures or researching more about the animals featured in the movie. Additionally, consider exploring topics such as environmental conservation and the importance of working together to protect our planet.
