

To make the sentence 'My rings are not hard; they are made of soft material.' sound less like it's generated by AI, consider using a more conversational tone. Here's a step-by-step breakdown:

1. **Identify the core message:** The original sentence indicates that the rings are soft.
2. **Use simple language:** Avoid complex phrases. For instance, you can replace 'not hard' with 'soft.'
3. **Make it personal:** Adding a personal touch can help. You could start with 'I have' instead of just 'My rings.'
4. **Combine thoughts:** Instead of using a semicolon, a simple conjunction might make it flow better.

With these steps in mind, a more natural-sounding version could be: 'I have soft rings, not hard ones.' This keeps the meaning intact but uses a simpler and more relatable structure.
