

# What are Colors?

Colors are what we see when light hits an object and reflects back to our eyes. **Every color is made from a mix of three main colors:** red, blue, and yellow.

## Let's Learn About Colors!

- **Red:** Like a strawberry or a fire truck!
- **Blue:** Like the sky or the ocean!
- **Yellow:** Like the sun or a banana!

When we mix these colors, we can make new colors!

## Mixing Colors

Here are some fun mixes:

- If we mix red and blue, we get purple!
- If we mix red and yellow, we get orange!
- If we mix yellow and blue, we get green!

So, every color comes from mixing!

## Why Are Colors Important?

Colors help us express our feelings and make the world beautiful! We use colors in art, clothes, and to describe everything around us.

Remember, look around and check out all the beautiful colors!
