

Hi there! You asked if pigs moo. That's a great question! Pigs are animals that make different sounds, but they do not moo. Mooing is the sound that cows make. Pigs usually make sounds like 'oink' or 'grunt.' When you hear a pig, you'll probably hear them say 'oink oink' or sometimes a snorting noise. So, pigs don't moo—they have their own special noises!

Isn't it fun to learn how different animals talk in their own special ways?
