

To round the number **9.43** to the nearest tenth, follow these steps:

1. **Identify the tenths place:** In the number 9.43, the tenths place is the first digit to the right of the decimal point, which is **4**.
2. **Look at the hundredths place:** This is the second digit after the decimal point, which is **3**.
3. **Apply rounding rules:** If the hundredths digit is 5 or more, you increase the tenths digit by 1. If it is less than 5, you leave the tenths digit as is.
4. Since the hundredths digit is **3**, which is less than 5, we do not increase the tenths digit.
5. **Write the rounded number:** Keep the tenths digit **4** and drop the digits after it. So, 9.43 rounded to the nearest tenth is **9.4**.

Final Answer: 9.43 rounded to the nearest tenth is 9.4.
