

Sure! Let's break it down step by step. First, let's find out how many minutes are between 10:12 and 11:00. We start by figuring out how many minutes are left from 10:12 to 11:00.

For example, if we start at 10:12 and go to 11:00, there are 48 minutes left. Why? Because there are 60 minutes in an hour, and we've already used 12 minutes of the current hour, so  $60 - 12 = 48$  minutes.

Then, we add the minutes from 11:00 to 12:00. From 11:00 to 12:00, there are 60 minutes because it's a full hour.

Now, we add the minutes together. 48 minutes from 10:12 to 11:00 plus 60 minutes from 11:00 to 12:00 equals 108 minutes in total from 10:12 to 12:00.

So, if you start playing your game at 10:12 and play until 12:00, you have 108 minutes to play your game. Enjoy your game time!
