

Alright, young explorer, let's dive into the fascinating world of Ancient Egypt! Imagine a time long ago, when powerful kings and queens ruled over Egypt. One of the most famous queens was Cleopatra. She was known for being very smart and trying really hard to keep Egypt strong and independent. But, when Cleopatra died in 30 B.C., big changes happened in Egypt.

First of all, after Cleopatra's death, Egypt stopped having queens and kings of its own. Instead, it became a part of the Roman Empire! This means that the Romans, who were like the super strong neighbors from across the sea, took control of all the big decisions. They made Egypt their province, which is kind of like a big city being a part of a bigger country.

Second, the new Roman rulers brought their way of life with them. This includes their language, Latin, and their special foods and customs. Even the walls of temples and buildings started looking different because they were designed by the Romans. But don't worry! The Egyptians still kept many of their own traditions and beliefs. They continued to worship their own gods and goddesses, like Ra the sun god and Anubis the god with a dog's head.

Next, Egypt became the breadbasket of the Roman Empire. That's a fancy way of saying they produced a LOT of food, especially grain like wheat. The Romans loved the grains from Egypt because it helped feed people in Rome and other Roman cities. So, Egyptian farmers became very important, and they worked really hard to make sure the fields were always full of crops.

Finally, let's talk about the city of Alexandria. This city was super important both in Cleopatra's time and after. It became even more significant under Roman rule. Alexandria was like a big library and university rolled into one! Scholars from all over the world came to study there. They shared knowledge and made big discoveries that we still talk about today!

So, after Cleopatra's death, Egypt changed from being a kingdom to becoming part of the Roman Empire, with a mix of Egyptian and Roman ways of life. But through it all, the land of the pyramids kept its magic and mystery, capturing our imaginations even today!
