

Hi there! Do you know what basketball is? It's a fun game where players try to throw a ball into a big hoop, which is like a basket in the air.

The main **goal** of a basketball player is to *score points* by getting the ball into the hoop. Each time the ball goes into the hoop, the player's team gets points.

To do this, players have to:

- **Dribble** the ball, which means bouncing it while they run.
- **Pass** the ball to their teammates to help each other.
- **Shoot** the ball into the hoop to score points.

The team with the most points at the end of the game wins. So, the goal of a basketball player is to work with their team to score points and help their team win the game. It's all about playing, having fun, and trying your best!
