

Donkeys have big ears that help them hear sounds from far away. You can say this in other ways like:

- Donkeys use their big ears to listen to things that are very far.
- A donkey's big ears help it catch sounds that are far away.
- With their big ears, donkeys can hear far-off noises.
- The large ears of a donkey help it hear things that are far away.
- Big ears let a donkey listen to sounds from a long distance.

These sentences all explain the same idea in simple words that a 5-year-old can understand.
