

What Happens When Firefighters Get a Call?

When firefighters get a call, it's like getting a special superhero message! Here's what happens step by step:

1. **The Alarm Rings:** When someone sees fire or needs help, they call the fire station. This makes a loud noise, like a bell ringing!
2. **Firefighters Put on Their Gear:** The firefighters quickly put on their special clothes. They wear a helmet, jacket, and boots to keep them safe.
3. **Jumping on the Fire Truck:** The firefighters hop onto their big red fire truck, which is like their superhero vehicle!
4. **Going as Fast as They Can:** The fire truck has a loud siren that goes 'wee-oo, wee-oo,' and they drive as fast as they can to help people.
5. **Getting to the Scene:** When they arrive, they look for the fire or problem and team up to fix it. They spray water on the fire or help out in other ways.
6. **Helping People:** Firefighters always make sure everyone is safe. They help people leave the building if they need to.
7. **Back to the Station:** After the job is done, they go back to the fire station, take off their gear, and get ready for the next call!

So, when firefighters get a call, they turn into heroes ready to help in just a few minutes!
