Step-by-step process to choose and secure a name

1. **Clarify format & audience:** Is the station music, talk, news, community, or mixed? Target age, language mix (Tagalog/English), and coverage area (local, national, online) drastically change the right name.
2. **Pick tone & keywords:** Choose words that reflect vibe (e.g., 'tambayan' for chill youth, 'bayani' for heritage, 'h i m i g' for music).
3. **Create a shortlist:** Narrow 30 names to 5-7 favorites based on memorability, ease of pronunciation, and meaning.
4. **Availability checks:**
 - Domain: try example.com and ph domains (WHOIS or domain registrars).
 - Social handles: check availability on Facebook, Twitter/X, Instagram, TikTok (Namechk or manual search).
 - Radio frequency conflicts: ensure no nearby station uses an identical brand that could confuse listeners.
5. **Trademark & legal:** Search IPOPHL for trademarks in the Philippines and consult a local IP lawyer if you plan to build a big brand. Also check NTC rules if you will broadcast over FM/AM.
6. **Audience testing:** Do a quick poll (friends, social media, target demographic) for pronunciation, perceived meaning, and appeal. Drop options that confuse listeners.
7. **Visual & audio fit:** Imagine jingles, voiceovers, and logos. Short names often work better in audio IDs and station jingles.
8. **Finalize & register:** Register the domain and social handles first, then proceed with local broadcasting licenses and trademark registration if needed.

Quick logo and jingle tips

- Use simple icons tied to meaning: waves or sound bars for 'Himig'/'Tunog', a bahay or people icons for 'Bayanihan'.
- Pick 2-3 strong colors. For Filipino stations, warm hues (red/gold) or tropical blues/greens often resonate.
- Keep an ASI (audio station ID) that's 3-5 seconds: 'Tunog Pinoy, 101.1 FM — Himig ng Bawat Pilipino'.

Notes & cultural sensitivity

Use Filipino words authentically and avoid combining sacred or sensitive terms casually. If you use words from regional languages (Cebuano, Ilocano, etc.), verify the meaning with native speakers from that region.

Next step — tell me more

If you want, tell me: what format (music/news/talk), target city or region, and whether it's FM, AM, or online-only. I can then: 1) refine the list to match that format, 2) create 5 logo concepts, or 3) write a short jingle/ID script.

Good luck — and if you want a narrower list (e.g., only youth music station names), tell me and I will tailor it.
