

School Bus Safety Tips

Hi there! We're going to learn about school bus safety, which is super important for keeping you safe when you go to school. Let's take it step by step!

1. Waiting for the Bus

When you wait for the bus, you should stand back from the road, at least five big steps. This helps you stay safe and not too close to cars that might be driving by.

2. Stay Calm and Quiet

When the bus comes, remember to stay calm and quiet. This helps everyone hear the driver better. If it's noisy, the driver might not see you!

3. Riding the Bus

Once you are on the bus, find a seat and sit down. Keep your backpack and things on your lap. It's also good to sit quietly and not distract the driver so they can focus on driving safely.

4. Getting Off the Bus

When it's your stop, don't rush! Wait until the bus stops completely. Then, get off slowly and carefully. Once you are off, take five steps away from the bus before turning around.

5. Look Both Ways

After you get off the bus, remember to look both ways before crossing the street. Always make sure there are no cars coming!

6. Follow the Driver's Instructions

If the bus driver says something, always listen carefully. They are there to keep you safe.

7. Ask for Help

If you ever feel scared or unsure, you can always ask a grown-up, like your teacher or a parent for help!

Remember, being safe on the bus is very important, so make sure to follow these tips every time you ride. Have a fun and safe ride to school!
