

The name 'Popeye' originates from the famous cartoon character created by Elzie Crisler Segar. First appearing in the comic strip 'Thimble Theatre' in 1929, Popeye is a spinach-loving sailor known for his adventurous spirit and distinctive appearance, which includes bulging eyes and tattooed arms.

The story behind the name itself is quite interesting. The character was initially conceived as a sidekick to the character Olive Oyl, but he quickly became the protagonist of the series. The name 'Popeye' is often thought to reference the character's unique physical attributes; his bulging eyes were humorously described as 'popping out' of his head, leading to the nickname. Additionally, it fits the quirky and whimsical nature of the comic strip, which often featured exaggerated characters.

Moreover, Segar's choice of the name aligns with the nautical themes prevalent in the series, as it resonates with the rough-and-tumble image of sailors. Overall, 'Popeye' has become synonymous with resilience, humor, and the importance of health, as seen in his love for spinach, which grants him superhuman strength.
