

Imagine a big, happy floating hotel – that's a cruise ship! Many people work on the ship to take care of it and everyone on board. Here's how it works:

1. **The Captain:** Think of the captain as the boss of the ship. They steer the ship and make sure everyone is safe.
2. **The Crew:** There are lots of crew members. Some of them are like friendly helpers who clean your room and make the food. Others help with swimming pools and fun games!
3. **Engineers:** These are the smart people who keep the engines running so the ship can float and move. They make sure everything is working perfectly!
4. **The Chef:** Just like Mommy or Daddy cooking at home, the chef cooks delicious meals for everyone to enjoy!
5. **Entertainment Team:** They organize games, shows, and parties so everyone can have fun while sailing!

So many different people work together to keep the cruise ship a happy and safe place for everyone!
