

Who Takes Care of a Cruise Ship?

Imagine a big, floating hotel with lots of fun activities! That's what a cruise ship is like. But who makes sure everything runs smoothly? Let's find out step by step!

1. The Captain

First, we have the captain! The captain is like the boss of the ship. They know how to steer it and make sure everyone stays safe on the water.

2. The Crew

Then comes the crew! They are the people who help the captain. There are many types of crew members:

- **Deckhands:** These are the helpers who take care of the outside of the ship.
- **Engineers:** They make sure the ship's engines work, so the ship can move.
- **Cooks:** They prepare yummy food for everyone onboard.
- **Housekeepers:** They clean the rooms and keep everything tidy.

3. Entertainers

There are also entertainers who make sure everyone has fun! They plan games and shows to keep passengers happy.

4. Safety Workers

And we can't forget the safety workers! They help keep everyone safe, showing what to do in case of an emergency.

In Summary

So, a cruise ship is taken care of by many people, all working together like a big team! From the captain to the crew and everyone else, they all help make sure the ship is a fun and safe place to be!
