

Okay, little one! Let's talk about crossing the railway. The railway is where trains go, and we have to be very careful around it!

1. ****Look for a Crosswalk****: First, find a special path called a crosswalk. This is a safe place for people to walk. It's like a magic line that shows you where to go.
2. ****Wait for the Trains****: Before you cross, you must listen and look for any trains. If a train is coming, we have to wait and not cross! Trains are very big and fast.
3. ****Cross Only with an Adult****: Always hold hands with a grown-up when you are crossing. They can help you stay safe!
4. ****Follow Signals****: Sometimes, there are lights or signs that tell you if it's safe to walk. Red means stop, and green means go! If you see these signs, make sure to pay attention and follow them.

So remember, always look and listen for trains, use the crosswalk, hold hands with a grown-up, and follow the signals. That's how you can cross the railway safely!
