

Ice cream vans are really cool trucks that bring yummy ice cream to people! The most important thing inside the van is a big freezer. This freezer keeps lots of wrapped ice cream frozen and ready to eat.

Some ice cream vans even have special machines that can make ice cream right there! These machines mix different ingredients to create all sorts of tasty flavors like chocolate, vanilla, and strawberry! You can walk up to the van, pick your favorite flavor, and get a delicious treat that makes hot days so much better!
