

Okay, little buddy! Let's think about a big boat that sails on the ocean. This big boat is called a ship!

Now, have you ever seen a big ship? It looks really cool, right? But guess what? A ship can't go anywhere all by itself. Just like how you need your friends or family to play with you, a ship needs people to help it!

These people are called a crew. The crew is like a team! Each person has a special job to do. Some people steer the ship, some people help with the sails, and others make sure everyone is safe.

So, when we say, 'Every ship has a crew,' it means that to make things happen, like going on an adventure across the sea, people have to work together as a team!

Isn't that fun? Just like how we play together and help each other! Each person is important so everyone can have a good time!
