

Hey there! Let's talk about country music! Country music is like a happy song that makes you want to tap your feet and dance. It has a nice beat that's easy to remember, kind of like counting to four!

Most country songs are like little stories. They talk about things that happen on a farm, like taking care of animals or riding tractors. They also talk about friends and family, which means the people we love and spend time with.

So, when you listen to country music, you can sing along and imagine fun times on the farm or sharing giggles with your friends and family!
