

What is a Jazz Band?

A jazz band is a group of people who play music together. They make fun, lively sounds! Usually, a jazz band has different instruments like:

- **Saxophone:** It looks like a tube and makes a smooth, shiny sound.
- **Trumpet:** It is like a shiny horn that makes bright sounds.
- **Piano:** You press the keys to make nice melodies!
- **Drums:** You hit them to keep the beat and make it exciting!

When these instruments play together, they create jazz music. Jazz is often very happy and makes people want to dance. Sometimes, band members play solos, which means one of them gets to play by themselves, and it sounds amazing! Jazz bands can be big or small, and they often play in places like parties or on stage. It's all about having fun with music!
