

A truck is a big vehicle that helps carry things. Think of it like a big toy car, but it can hold lots of stuff! Trucks usually have big wheels, and they can be really strong. They drive on the road and can carry things like toys, food, or even big machines to places they need to go. Just like how we sometimes move our toys from one place to another, trucks help move things to different places too!

Trucks come in many colors, like red, blue, and yellow, just like your crayons! When you see a truck, you can wave and say, 'Hi, truck!' because they are very busy helping everyone.
