

Monkeys are very funny and silly animals! They love to play and have lots of fun. Sometimes they swing on big, long vines that hang down from the trees. This is called swinging on lianas, and they do it because it makes them feel happy and free, just like how you feel when you play on a swing at the park!

Monkeys also love to make funny faces. They might stick out their tongues or make silly noises to make each other laugh. Just like when you pull a funny face to make your friends giggle! So, if you think about monkeys, imagine them laughing, playing, and having a great time all day long!
