

# How Firefighters Respond to a Call

Okay! Imagine there is a phone ringing, and it means there might be a fire somewhere. Here's how firefighters help:

1. **Phone Rings:** When someone sees smoke or fire, they call a special phone number called 911.
2. **Fire Station:** At the fire station, firefighters answer the phone quickly. They listen carefully to the person who called.
3. **Gathering Gear:** After talking, the firefighters put on their special clothes called fire suits. These suits help protect them from hot fire and smoke.
4. **Jump on the Truck:** Next, they run to their big red fire truck. It's loud and has flashing lights!
5. **Drive Fast:** The firefighters drive quickly to where the fire is. The truck makes noises like "weee-ooo-weee-ooo!" so everyone knows they're coming.
6. **Reach the Spot:** When they arrive, they look around to see where the fire is. They are brave!
7. **Put Out the Fire:** The firefighters use water from the truck to spray on the fire. This helps make it go away!
8. **Check for Safety:** After the fire is out, they check to make sure no one is hurt and everything is safe again.
9. **Go Home:** When everything is safe, the firefighters get back in their truck and go home to have a snack!

That's how firefighters respond to a call! They are heroes who help keep everyone safe!
