

Hey Rylee! Let's Learn About Multiplying 9s!

Multiplying is like adding lots of the same number together. So when we multiply 9s, we're adding 9 again and again.

For example, if we say 9×1 , it's like saying we have 1 group of 9. So we just have 9!

If we say 9×2 , it's like having 2 groups of 9. That makes $9 + 9$, which is 18!

Now let's try 9×3 ! That's like having 3 groups of 9. We can add it up like this: $9 + 9 + 9 = 27$!

Can you see the pattern? Every time we go up in the number we're multiplying by, we add another 9. So it goes like this:

- $9 \times 1 = 9$
- $9 \times 2 = 18$
- $9 \times 3 = 27$
- $9 \times 4 = 36$
- $9 \times 5 = 45$
- $9 \times 6 = 54$
- $9 \times 7 = 63$
- $9 \times 8 = 72$
- $9 \times 9 = 81$
- $9 \times 10 = 90$

Look! Each answer gets bigger. The more we multiply, the higher the numbers go! Isn't that fun? Just remember, it's all about adding 9 lots of times!
