

Which Vehicle Can Go There?

Okay, little friend! Let's think about places we can go. Some places are close, like a park, and some are far away, like Grandma's house.

We have different kinds of vehicles that can help us get to those places:

- **Bicycle:** This is great for riding to the park nearby!
- **Car:** This is good for going to Grandma's house that is a bit farther away!
- **Bus:** Lots of kids can go to school on the bus!
- **Train:** We can take a train to visit different cities!
- **Airplane:** This one flies way up high to get us to faraway places like another country!

So, we can choose the right vehicle depending on where we want to go. If it's close, maybe a bicycle or walking is best. If it's far, we might need a car or even an airplane!
