

Okay, little buddy! Let's imagine we are playing a fun game where we have some instruments, like a tambourine, a drum, and a flute! ☐

First, we will look at the shadow of each instrument. Shadows are like dark shapes that happen when light shines on something. **Let's pretend we see the shadow of a tambourine!** ☒

Now, we need to find the instrument that looks like that shadow. We look for the shiny tambourine! Do you see how the shape of the tambourine matches the shadow? ☐

Next, we can look at the shadow of the drum. **It's round and big!** ☐ What instrument can make a shadow like that? Yes, it's the drum!

Lastly, let's check the shadow of the flute. **It's long and thin like a stick!** ☐ We can find it by looking for the flute.

So remember, we look at the shapes of the shadows and find the instruments that match those shapes! It's a fun way to play with lights and shapes! Are you ready to try finding some shadows? Let's go! ☐
