

When we talk about materials, we mean different things we can use to make something fun and cool! Let's look at some things:

- **Paper:** You can use paper to make drawings, cards, or origami animals! Just fold it carefully.
- **Cardboard:** If you have an empty box, you can turn it into a spaceship or a house for your toys!
- **String:** Using string, you can make friendship bracelets or tie things together.
- **Colors:** Crayons and markers help you add bright colors to your pictures.
- **Nature Items:** You can collect leaves and flowers to make beautiful nature collages.

So, with just these materials, your imagination can create so many fun things!
