

Okay, little buddy! Let's play a fun game called 'Spot the Objects'! This game is all about looking at pictures closely and finding different things in them.

Imagine you have a picture of a farm. In that picture, there are lots of things like cows, horses, trees, and a barn. Your job is to look carefully and **find these objects**.

Here's how we can do it step by step:

1. **Look at the picture:** Take a good look at the whole picture first.
2. **Search for objects:** Start looking for one thing at a time. For example, can you find the cow?
3. **Circle or point at it:** If you're using a pencil or a finger, circle it or point to it when you find it!
4. **Keep going!:** After you find one object, look for the next one, like the horse or the tree!

This game helps you practice looking closely and also teaches you about different objects we can see in the world around us. Plus, it's super fun! Are you ready to try finding some objects?
