

Hi Troy! The word '**satisfying**' means that something makes you feel happy or good inside. It's like when you eat your favorite ice cream and it tastes really yummy; that feels satisfying, right? Or when you finish a puzzle and all the pieces fit perfectly, that also feels satisfying because you did something great. So, something that is satisfying makes you feel pleased or happy about it!

Think of it like this: when you do something well or enjoy something a lot, that's a satisfying feeling!
