

Okay, imagine you have a special ice cream that is super soft and creamy! This ice cream comes out of a big machine that makes it very fluffy. When it's time to serve, the ice cream swirls around in a cone or a cup. The swirl looks like a cute little twirl or a soft point at the top of the ice cream, kind of like a soft, fluffy cloud!

To make that swirl, the person at the ice cream shop holds the cone and presses a button on the machine. The machine fills the cone with ice cream while moving in a circle. That's how it forms that lovely spiral on top! It's a fun little shape that makes the ice cream look extra yummy! And guess what? You can add toppings like sprinkles or chocolate sauce on the swirl to make it even better!
