

A builder is a person who helps make things like houses, buildings, and sometimes even playgrounds! Imagine you want to build a big tower with your blocks. A builder does that but with real blocks and tools. They look at the plans, just like you might look at a picture, and then they use their special tools to put everything together. Builders are very good at making sure everything is safe and strong so that people can live or play in it.

So, next time you see a house being built, you can think of the builders working hard to make a nice place for everyone!
