

The word **prevalent** refers to something that is widespread, commonly occurring, or generally accepted in a particular area or among a group of people. It often describes trends, beliefs, or conditions that are more noticeable or dominant at a certain time.

For example, if we say that a particular disease is **prevalent** in a community, we mean that many people in that community have or are affected by that disease. Similarly, you might hear that a style of clothing is **prevalent** among teenagers, indicating that many teenagers are wearing that style.

Using the word **prevalent** can add depth to your essays or conversations, as it indicates not just a presence but a significant number of instances or endorsement in a social context.
