

Okay, little buddy! Let's talk about city vehicles. These are the cars, buses, trucks, and other big machines you see on the road. They have important jobs, no matter what the weather is like – whether it's rainy or sunny!

- 1. Come rain or shine:** This means that whether it's raining or the sun is shining bright, the vehicles keep working!
- 2. Some take people places:** Think about the buses or taxis. They help people get to school, parks, or their homes!
- 3. Others carry packages:** You know those big trucks that bring things to the store? They carry packages filled with toys, food, and other goodies!

So, city vehicles are super important because they help everyone move around and get what they need, no matter the weather!
