

Okay, imagine you want to send a letter to your friend. You know how you have to give your letter to the postman so it can go to their house? To do that, you need to put a little picture on the corner of your letter called a **stamp**.

A stamp is like a tiny ticket that tells the postman, 'Hey, I need you to take this letter to my friend!' So when you **stamp the letter**, you put that stamp on it, and then it can go on a big journey to reach your friend's mailbox.

So, stamping the letter is just making sure your letter is ready to travel, just like packing your toys in a bag when you go to a friend's house!
