

The postal service is like a big team that helps us send letters and packages from one place to another. Here's how it works step by step:

1. **Writing a Letter:** First, you write a letter or put something special in a box, like a gift.
2. **Putting it in an Envelope:** You put the letter or gift in an envelope or box and close it up so it stays safe.
3. **Addressing it:** You write the address on the envelope. This tells the postal team where to go, like a treasure map!
4. **Getting it to the Postal Office:** Someone takes your letter to the postal office. This is like a big hub where all the letters go to get organized.
5. **Sorting the Mail:** The postal team sorts the letters and packages, just like separating toys into different bins, so they know where each one goes.
6. **Delivering the Mail:** Finally, the postal workers put the letters in their special delivery trucks and take them to your friend's house or wherever they need to go!

And that's how we send things using the postal service! It helps us share fun things like birthday cards or letters with our friends and family, even if they live far away.
