

Exploring Habitats and Animals!

Hi Lidziya! Today, we're going to learn about some special places called habitats, where different animals live. Let's explore together!

1. Forest

In the forest, there are many trees and plants. **Bears** live here! They are big and like to catch fish in rivers.

2. Desert

The desert is very hot and dry. **Cammels** are great here. They can go without water for a long time!

3. Ice and Snow

In places that are very cold, we find a lot of ice and snow. **Penguins** live here. They love to slide on the ice!

4. Jungle

The jungle is very green and has big trees. You can find colorful birds called **Toucans** swinging from tree to tree!

5. Lake

Lakes are filled with water. **Deer** come here to drink, and sometimes you can see a **lizard** sunbathing on a rock!

6. Mountain

Mountains are very tall and rocky. **Owl** likes to live there because it can watch over everything at night!

7. Ocean

The ocean is big and filled with water. You can meet a friendly **Sea Lion** swimming, and watch out for fast **Sharks**!

8. Rain Forest

In the rain forest, it rains a lot and is very warm. You might see a colorful **Snake** curled around a tree!

Conclusion

Whew! We learned about so many habitats and the animals that live there! Isn't it cool how different they all are? Can you tell me your favorite animal from these habitats?
