

# Let's Talk About Habitats and Animals!

Hi Lidziya! Today, we are going to learn about different places where animals live. These places are called habitats! Each habitat is special for different animals. Let's explore them one by one!

## 1. Forest

In a forest, you can find big trees and lots of leaves. Animals like **bears** and **deer** live here. Bears can be big and furry, and they like to eat berries!

## 2. Desert

The desert is very hot and sandy. Here, the **camel** lives. Camels can go a long time without water, and they are very good at walking in the sand.

## 3. Ice and Snow

Some animals like **penguins** and **polar bears** live in the ice and snow. They are very good at staying warm in the cold!

## 4. Jungle

The jungle is very green and has lots of tall trees. Fun animals like the colorful **toucan** can be found here. They have big beaks and love to eat fruits!

## 5. Lake

A lake is a big pool of water. Animals like **lizards** and fish swim here. The water is home for lots of little creatures as well!

## 6. Mountain

On the mountains, you might see **lions** and eagles flying high in the sky! Lions are big and strong.

## 7. Ocean and Sea

In the ocean, many amazing animals like **sharks** swim. Sharks are very fast and strong! You can also find pretty fish and dolphins jumping in the waves.

## 8. Rain Forest

The rain forest is always wet and has a lot of plants. You can find animals like the cool green **snake** and many colorful birds.

## 9. Night Time Habitats

At night, animals like **owls** come out. They can see very well in the dark!

## Let's Remember!

So, every habitat like the forest, desert, or ocean is home to many different animals. Isn't that amazing? Every animal has a special place where they feel safe and happy!
