

## Sending Big Parcels by Mail

Did you know that you can send big boxes and packages through the mail? It's true! Let's break down how this works step by step:

1. **What is a Parcel?** A parcel is just a package or box that you want to send to someone. It can have clothes, toys, or even books inside!
2. **Finding the Right Box** First, you need a box that is big enough to hold whatever you want to send. You can use a cardboard box that you might have at home or buy one at a store.
3. **Packing Your Parcel** Next, put your items inside the box and make sure they are safe. You can use crumpled paper or bubble wrap to keep them from moving around too much.
4. **Sealing the Box** After everything is packed tightly, close the box and seal it with tape. This helps make sure that nothing falls out when it's being delivered.
5. **Addressing the Parcel** Now, you need to write the address of the person you are sending it to on the top of the box. This is very important so the mail carrier knows where to take it!
6. **Taking it to the Post Office** Finally, you can take your big parcel to a post office. They have special services for sending big packages. They will weigh it and tell you how much it costs to send.
7. **Getting it Delivered!** After paying for the shipping, the post office will help send your parcel to your friend or family member, even if it's really big!

So, see? Sending a big parcel is easy! You just need a good box, some packing material, and a way to send it through the mail!
