

What Do Firefighters Do?

Firefighters are very brave people who help keep us safe from fires and emergencies. When there is a fire, they rush in to rescue people and put out the fire.

What is a Firefighter Ladder?

Firefighters have special tools they use, and one important tool is their ladder!

Sliding Up and High

This ladder is not just any ladder; it can slide up really high! Imagine a tall tree or even a big building. If someone is stuck way up there, the firefighter can make the ladder go up, up, up to help them!

How Does It Work?

The ladder is designed to extend and slide. Firefighters pull a rope or push a button, and the ladder can grow longer!

Why is it Important?

This is important because it lets firefighters save people who might be in trouble high off the ground. They can reach windows and rooftops quickly to help!

Conclusion

So, when you see a firefighter's ladder, remember that it is a special tool that helps them slide up really high to keep everyone safe!
