

What is a Firefighter?

A firefighter is a brave person who helps put out fires. They wear special clothes to keep them safe. When there is a fire, they rush to help people and protect buildings.

What is a Fire Truck?

A fire truck is a big, red vehicle that firefighters use to get to fires quickly. It has lots of tools and equipment inside, like hoses to spray water and ladders to reach high places.

What is a Ladder on a Fire Truck?

The ladder on a fire truck is very long and can reach tall buildings. Firefighters use it to climb up and rescue people from high places, like the top of a building or a tree. The ladder can usually move up and down to help them get to where they need to go!

Why is the Ladder Important?

The ladder is important because sometimes fires happen high up, and firefighters need to get to those places to help people. Without the ladder, it would be much harder to do their job! So, firefighters and their fire truck ladders work together to keep everyone safe.
