

# All About Roosters!

Hi there, little friend! Today we're going to learn about a special bird called a **rooster**. Roosters are known for their bright colors and loud sounds!

## What is a Rooster?

A rooster is a male chicken. They are often very colorful with shiny feathers that can be red, green, yellow, and blue! Roosters are known for being proud and brave.

## The Rooster's Morning Call

One of the most famous things roosters do is their morning call! They say "cock-a-doodle-doo" to let everyone know it's time to wake up! This sound is very loud and can be heard from far away.

## Why Do Roosters Make Sounds?

Roosters make sounds to talk to other chickens, to warn them about danger, or to show they are the leader of the group. They are very helpful to the hens, which are the female chickens.

## Where Roosters Live

Roosters usually live on farms or in backyards. They love to run around and sometimes they help farmers by keeping the hens safe and happy!

## Fun Facts About Roosters:

- Roosters can see colors just like we can!
- They can also recognize their friends and family!
- Some roosters can even jump really high!

## Conclusion

Roosters are not only colorful and loud, but they are also very important on a farm. They help take care of the hens and wake everyone up in the morning. Next time you hear a rooster, remember all the fun things we learned today!
